National Referral Mechanism Statistics – 2017 Quarter 2

This report presents a summary of the number of potential victims of modern slavery referred into the National Referral Mechanism (NRM) during the period 1st April to 30th June 2017.

The figures used are from the NRM data with a cut-off date of 10/07/2017. Some of the cases remain open with the Competent Authorities and decisions on their trafficking status are yet to be made. The NRM is a 'living' process and data should be considered provisional until all cases are concluded. Some values may differ from previous or future reports as supplementary information is revealed throughout the duration of a case and their records are adjusted accordingly.

This report does not provide any analysis of the picture of modern slavery in the UK. It provides figures relating to the number of potential victims that have been referred into the NRM process during the reporting period April to June 2017, but does not contain decision data for the year to date due to the number of pending cases.

Changes Introduced to NRM Data Management

Previous iterations of this report were produced on the basis of the police force and country location of the first responder, irrespective of the claimed location exploitation or residence of the potential victim at the time of referral. This led to invalid hotspot analysis of the data being applied to police force areas and the devolved regions of the UK.

Following the July 2016 clarification and subsequent update in July 2017 within the Home Office Counting Rules¹ (HOCR) whereby:

“all referrals made by the police into the NRM and all those that the police receive from the NRM with a positive reasonable grounds decision applied must be subject of a recorded crime of MS (modern slavery)”

A subsequent NCA review established that the previous statistical attribution of referrals to a particular country within the UK on the basis of the location of the first responder was misleading.

In support of HOCR requirements, NRM referrals are now screened against the below criteria in order to identify the responsible geographical police force. Once identified, the referral is transmitted within one working day to the relevant Force Intelligence Bureau (FIB), or stipulated point of receipt within force for action. The reasonable grounds decision, once made, is subsequently notified to the force by the competent authority.

Criteria applied to identify relevant force

The force has acted as first responder, or the referral indicates that the force are already involved in the recording/investigation of the potential modern slavery human trafficking (MSHT) offences;

or

The potential victim has been exploited within the force area;

or

The potential victim has been exploited abroad, or at an unknown location and the victim's address at time of referral is within the force area;

or

The potential victim has been exploited abroad or at an unknown location and they have presented to another first responder within the force area.

The Annexes to this report and table overleaf have been compiled on the basis of the location of police force that received the NRM referral, e.g. Wales will be comprised only of NRM referrals originating from, or sent to Dyfed-Powys Police, Gwent Police, North Wales Police or South Wales Police.

Annex F – Police Force Areas for Crime Recording Purposes

The following tables show the relationship between the first responder organisation and the police force to whom the subsequent NRM submission was transmitted for crime recording purposes under the Home Office Counting Rules.

The data represents referrals from all agencies, not just police forces. The table has been compiled under the revised NRM data management processes, as detailed at page 4 above.
